Subject to change please contact the owner for updated information.

Providing rural hospitality to our guests

Our guests will be given morning-harvested produce from our fields and neighboring farms. After years of working in a company, we retired and started a career of farming, agricultural processing and renting out farm land. Our guests are showered with the best rural hospitality we can provide.

Agricultural Activities according to the season

At Pension Suzuki Agri, there are many activities that you can participate in for an extra fee. Harvesting vegetables, planting rice, harvesting rice, peanuts or lima beans are just a few of the activities that we provide. Those whom would like to try these activities, please ask the owners at time of booking as they are subject to availability.
